Description:

Its an enthralling book to read because all the stories about these bands I love are so fun. However, I dont love how the author didnt put endnote numbers in the book for his citations; it makes finding his citation more difficult. I also think the author should have been more clear about when something is proven to have happened vs. when he just got a story from Guitar Magazine. Just because a roadie said it, doesnt mean its true. If these types of stories were differentiated in the book, it would be easier for the reader to understand whats what and make their own decision on whats likely to be true. Still, its engrossing and Im going to read the whole thing because not enough people write about heavy metal!! So, thanks David Konow. :)
